

Deta Electrical Company Limited is committed to reducing the impact of its activities, products and services on the environment. We aim to achieve this by setting objectives and targets relating to the key environmental aspects of its operation.

We undertake to identify and comply with all relevant environmental legislation and other requirements relating to the environmental aspects of its operation.

We undertake to examine and measure the impact of our processes in order to prevent pollution in the context of the organisation.

Our dedicated and competent team are trained to be aware of the environmental impact of their daily activities and to reduce their impact where possible.

We will ensure that sub-contractors undertaking work on our behalf conduct their activities in line with this environmental policy.

Our approach is underpinned by our environmental management system registered to ISO 14001 which provides the framework for managing our environmental impact and achieving continual improvement to enhance the environmental performance of the company.
